

Intermediate Separators and Stand-Alone Cyclonic Baghouses

Vector offers a wide range of high efficiency cyclones, separators, cyclonic baghouses, drum fillers, self-dumping hoppers and other specialized intermediate separators. Many are available in trailer mounted or skid mounted configurations. All of these intermediate systems provide excellent separation and if used for vacuuming dry bulk materials each will generally capture the most if not all “heavy” materials. Vector Intermediate Separators and Stand Alone Baghouses are often utilized as components of central vacuum systems for in-plant use or in conjunction with vacuum trucks.

Roadworthy Trailer Cyclone Separators & Baghouses Designed To Work With Any Vacuum

72" Cyclonic Baghouse with Optional Service Platform and Extension Legs

Spartan II Vacuum Working With Optional Self-Dumping Two Yard Hopper

44" Cyclonic Baghouse On Skid

Top Hat Drum Filler That Works With Any Vacuum

Self-Dumping One Yard Hopper For Use With Any Vacuum System
