PRELUDE

THE COMMON PARTS CATALOG

Vector Technologies Ltd. has prepared the Common Parts Catalog to facilitate ordering parts for your VecLoader vacuums and other Vector equipment. In the table of contents, we section the catalog into parts groupings to aid the user in quickly locating the desired part or parts. We then list part numbers and descriptions within each parts group.

In the back of the catalog, we prepare a comprehensive addendum that pictorially shows equipment and its major operating components with written captions. This section aids users in better articulating their needs to the Vector Customer Service Staff.

We recommend using only authorized Vector factory parts. Prices are subject to change without notice. We hope that you find the catalog informative and we welcome any suggestions to improve its quality.

Yours Sincerely,

The Vector Technologies Ltd. Customer Service Staff
