VecLoader HEPA Vac's are powerful, completely self-contained, critical filtered vacuum systems, capable of conveying asbestos and other contaminated solids, slurries, powders and liquids. Their power allows maximum vacuum performance for long run conveyance from high-rise buildings, tunnels, confined areas and crawl spaces using either a five or multiple smaller diameter hoses. All processed air within the fully enclosed negative pressure system is thoroughly scrubbed by a unique four-stage filtration process. Complete control of the system is maintained by the operator, with all collected materials being easily bagged through a specially designed discharge valve at the operator's workstation.

Options and Available Designs (Standard components are noted in italics):

Power: Diesel, electric, explosion resistant. **Mounting:** Road legal trailer, all terrain, skid, truck, crane.

Unloader Valves: Patented Vector Controlled Dump Valve

Filtration: HEPA, 9998 at .3 microns, nuclear, carbon, product specific.

Accessories: Cyclone drum fillers, intermediate hoppers and separators, bagging stations, bulk insulation shredders, vacuum hose, specialty nozzles, early warning shut downs, and engineered solutions.
