Insist on the original VecLoader® and the tools to do the job right!

Ballast Unloader

Rock Scoop at Work

Wet Head® Nozzle and Pump

Vacuum River Rock

Vector Technologies and its Vacuum Engineering division began building vacuums for gravel and ballast removal over thirty years ago. VecLoader vacuums have been on thousands of roofing jobs and enjoy a devoted following among roofing professionals. At Vector Technologies Ltd. we take great pride in our roots and our continuing commitment to your Professional community.

VecLoaders represent the most advanced all-purpose vacuums available, combining unequaled power with unparalleled reliability. Completely self-contained, VecLoaders vacuum and directly unload wet or dry materials into a truck, dumpster or other collection device. The shoveling, hoisting, dumping, and multiple handling associated with other systems, is eliminated. VecLoaders stay on the job full time--with quick, uncomplicated job-site setup and minimal maintenance. Several of the units can be trailed along with vacuuming hose and accessories, be moved by a one-ton truck. Stationary and skid-mounted designs are also available.

VECLOADER® VACUUMS

MODELS	Mini-VecLoader 100	522	624	721	6150R
