## Hercules™ Series Vacuums

### Vacuums for Industry - Smaller Sized 3 to 30 Horsepower

Hercules portable vacuums features super efficient baghouses and either regenerative or positive displacement vacuum pumps providing the filtration and power needed to complete the most difficult cleanup or recovery operation. Units can be pushed, pulled, hooked to a crane, or picked up with a forklift.

<u>Model</u>	<u>Max CFM</u>	<u>Max H.P.</u>	<u>Air To Cloth Ratio</u>	<u>Maximum Vacuum Water</u>
QV300	145	3.0	4.2:1	96"
QV500	219	5.0	6.3:1	113"
QV600	219	6.0	6.3:1	127"
QVR50	219	5.0	4.1:1	113"
QVR60	219	6.0	4.1:1	127"
QVR85	385	8.5	7.2:1	125"
QVR120	385	12.0	7.2:1	141"
QVR85L	385	8.5	5.1:1	125"
QVR120L	385	12.0	5.1:1	141"
QVR150L	555	15.0	7.3:1	130"

DV20	500	20.0	7.6:1	168"
DV25	600	25.0	9.1:1	196"
DV30	650	30.0	9.8:1	224"

Our Hercules™ Vacuum ranges from 3.0 – 30 horsepower and features super efficient baghouses and either regenerative or positive displacement vacuum pumps providing the filtration and power needed to complete the most difficult cleanup or recovery operation. Units can be pushed, pulled, hooked to a crane, or picked up with a forklift.

Our 3.0 – 7.5 horsepower range was specifically designed to handle dry, ultra-fine powders without the filters blinding. An ultra-efficient, triple filter system allows operators to continuously vacuum powders like toner dust and pigments - without filter hassles and clogs! Our 7.5 -10 horsepower range takes fine powders in stride by combining a super-efficient, triple filter system with a strong, super-quiet regenerative or positive replacement type vacuum producer. Now you can quickly vacuum powders like carbon black and powder paint - without filter hassles and clogs! The versatile larger systems ranging from 15 – 30 horsepower combine industrial class suction with a high performance triple filtration system. And its positive displacement vacuum pump attains 16" Hg. and it actually pulls harder as the hose fills with material. This means that it can pick up material three times faster than vacuums using centrifugal pumps.
